

WHO TO CONTACT ABOUT STREETLIGHT OUTAGES

The City of Wixom has been working with Detroit Edison's Community Lighting group to expedite the repair and maintenance of the streetlights in our community. In the event of a streetlight outage, please call the Department of Public Works at (248) 624-0141, Monday - Friday, 8:30 a.m. - 5:00 p.m. with the following information:

1. A specific streetlight (i.e., the nearest cross roads, nearby business, etc.)
2. Whether the pole is wooden or metal.
3. The streetlight pole number
 - For wood poles, it is located approximately eight feet up the pole.
 - For metal poles, it is located at the base of the streetlight pole.
4. Details about the outage (i.e., light is off during the night, light turns on and off at night, light stays on during the day, etc.)

In cases where a pole has been knocked down or any other emergency, please call Detroit Edison directly at (800) 477-4747.
